104. The computer readable medium of claim 99, wherein the mobile device includes a processor, and further, wherein the processor controls a telephony function.

Remarks

This is a preliminary amendment filed with an accompanying request for a continuation application to U.S. Patent Application Serial No. 08/987,346.

Applicants respectfully request the Examiner to enter the above amendments before considering the patent application.

The amendment to the title is intended to make it more consistent with the new claims, and that to the specification is for the purpose of reciting the relationship with the pending application. Pending claims 1-31 are canceled by virtue of the preliminary amendment, and new claims 32-104 are added. The new claims find support in the specification and no new matter has been added by the amendments.

The applicant believes \$1,948.00 is the only fee to be due in this amendment. The Commissioner is authorized to charge this fee and any fees beyond this amount which the PTO believes may be required, or to credit any overpayment, to Deposit Account No. 50-0516.

Please telephone the undersigned at (650) 817-1610, if there are any questions, or if a conference with the Examiner would assist in the examination of this case.

Respectfully submitted;
